

CSE: GOAT

The last decade was hotter than any period in the last 125,000 years...

As the world continues to grapple with the effects of climate change, innovative solutions are needed now more than ever before.

The ocean economy presents a powerful and untapped solution.

What is it?

The ocean economy (or the blue economy) is the sustainable use of ocean resources for economic growth, while reducing the environmental footprint.

Sectors in the ocean economy include:

- Aquaculture
- Fishing
- Waste disposal
- Blue tourism

Why is it important?

As of 2020, the ocean economy accounts for roughly \$31.6 billion (CAD) in GDP each year.

The global economic output of ocean economy activities is currently valued at \$1.5 trillion (USD).

The healthier an ocean, the more carbon dioxide it can remove from the atmosphere.

That's why prioritizing the sustainable use of our oceans isn't just good for the global economy, it's a critical element in the fight against climate change.

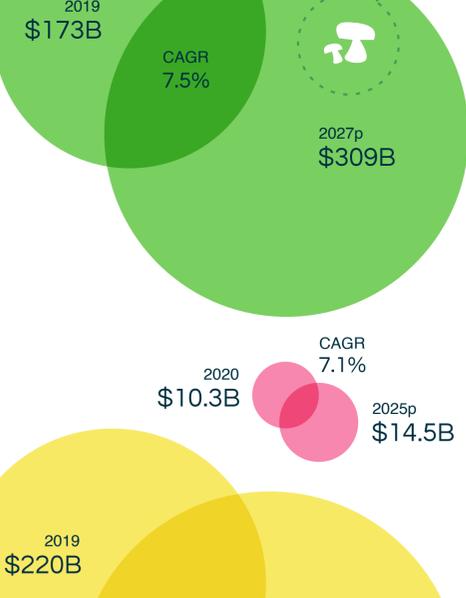

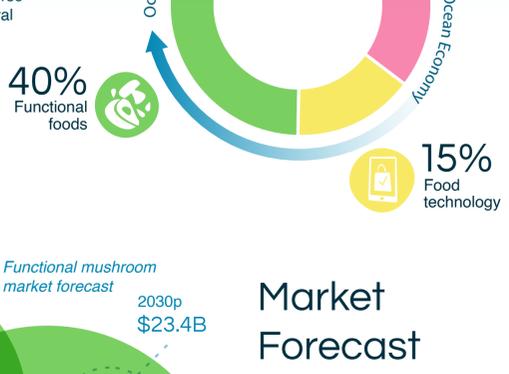

Sustainable Food Solutions: Your Path to Investing in the Blue Economy

Billy Goat Brands (CSE: GOAT) ("GOAT") is a premium investment platform offering investors exposure to a diverse set of expansion-stage companies with environmental, social, and governance (ESG) values in the ocean economy.

Target Portfolio Distribution

GOAT allocates capital and resources to develop businesses that bring sustainable products to market while reducing their carbon footprint, waste, and emissions.

The GOAT portfolio boasts a diverse range of companies across several exciting industries.

Market Forecast

Also known as nutraceuticals, functional foods are those that have health benefits that go beyond basic nutrition.

Mushrooms, for example, are a functional food that are poised to see explosive growth in the near future.

Plant-based proteins

Alternative proteins will comprise up to one third of the total proteins market in 2024.

GOAT sees the opportunity to fill a big gap in the food industry by incubating businesses in the ocean economy that offer plant-based solutions and other alternatives in a market heavily dominated by the traditional meat industry.

Tony Harris
Chairman/CEO Billy Goat Brands

More Than An Investment Portfolio

GOAT identifies, invests in and incubates companies with ESG values and provides them with both the expertise and capital they need in order to scale.

- 100+ Identified Companies
- 40+ Advanced Discussions
- 20+ Entering Due Diligence
- 5-10 Final Investments

However, GOAT goes beyond simply investing in companies. While it provides the capital necessary for growth, the company is a strategic partner that provides mentorship, network connections, and ongoing support.

1 Identify
Identify exciting companies in a variety of markets that are primed for fast expansion.
Only 20% of companies make it past the GOAT screening process.

3 Incubate
Assist leadership teams in scaling production and distribution.
